

IN THE SPECIFICATION

Please cancel the entire specification of the subject U.S. patent application, as filed, including the Code number key, as constituted by the accurate translation of PCT/EP2004/050022, in favor of the concurrently submitted Substitute Specification. That substitute specification is the result of the entry into the translation of a cross-reference to related applications, of a discussion of several prior art documents, as was done in the PCT application, and of suitable section headings; the deletion of references to the claims and of the Code number key; the correction of various minor errors in phrasing, grammar and punctuation, and a general revision of the translation to place the substitute specification more in a form in accordance with U.S. practice. These various changes and corrections do not constitute any new matter. A marked-up copy of the translation, which shows the changes made thereto, to arrive at the substitute specification, is enclosed for the Examiner's review.
